

USE AND CARE OF LODGE EQUIPMENT

Revised 2-26-07

1. **KITCHEN:** Follow posted use and cleaning instructions in all areas. Store equipment in proper sections according to labeled doors/drawers. Proper food handling and sanitization of all surfaces should be followed for all meals (this is a Health Department requirement). Prior to checkout, all items must be properly sanitized and stored and all towels, etc. used by your group should be laundered and put away. If instruction is needed on use of any equipment, please call the Caretakers, who will be happy to assist.
2. **LODGE:** Arrange tables, chairs and pews to suit your needs; return to storage along edges of room prior to checkout. Follow posted cleaning instructions prior to checkout. Upstairs bathroom no longer usable and has been closed off, please keep out.
3. **BATHROOMS:** Please **DO NOT** adjust water tank controls, they are pre-set to Health Department requirements. We have a low-pressure system, use minimum amount of toilet paper and allow time for tanks to refill prior to next flush.
4. **GAMES/EQUIPMENT:** We don't have much, but you are welcome to use what we have! Please store properly when finished.
5. **WATERCRAFT:** Please lock up boats at night with chain provided. Lifejackets should be hung in equipment shed by water, and paddles etc. also stored there under padlock each night.
